

Marketplace Central

SUPPORT FOR WHEREVER YOU SELL & HOWEVER YOU SHIP.

Minisoft's Marketplace Central is a single solution to automate order fulfillment with all your marketplace retail partners and sales channels.

STAY IN SYNC WITH ALL YOUR MARKETPLACE PARTNERS.

MARKETPLACE CENTRAL provides seamless integration to popular seller marketplaces along with out-of-the-box integrations for most WMS, ERP or OMS backend fulfillment systems. Marketplace Central provides e-commerce retailers with a single automated solution for managing orders and inventory flows to stay in sync with any of their marketplace partners.

HERE'S HOW IT WORKS FOR: Amazon

STEP 1

Using the Amazon approved API, Minisoft's Marketplace Central automatically retrieves unshipped orders and delivery instructions for any orders that have been received.

STEP 2

Once the orders have been retrieved, they are automatically imported into your backend ERP, WMS or OMS system. Marketplace Central then compares the least costly Amazon approved carrier service that will meet each customer's delivery requirements.

STEP 3

Marketplace Central processes each shipment and produces the selected carrier shipping label. Amazon and the backend ERP, WMS or OMS systems are automatically updated with shipment tracking information and expected delivery times.

ORDER SOURCE
ERP / WMS / CMS / OMS

1. Request for unshipped orders
2. Label returned

Ship/FX

BUY SHIPPING

1. Request for unshipped orders
2. Shipment status updated

EASY ACCESS TO ALL YOUR MARKETPLACE PARTNERS.

Minisoft has built connectors that fully automate the collection of orders from Amazon, Wayfair, Walmart, eBay, Mercado Libre, Falabella, Target, Coppel, Shopify, AliExpress and Google seller marketplaces.

Marketplace Central features integrations for both Amazon Seller Central and Vendor Central marketplaces and supports the generation of Amazon AMZL (Parcel) and AMXL (Freight) carrier labels.

Marketplace Central also lets you access Amazon Buy Shipping to take full advantage of Amazon's purchasing power with parcel carriers.

For e-commerce retailers doing business globally, Marketplace Central provides support for several popular international seller marketplaces such as Mercado Libre, Falabella, Amazon Global, Coppel and AliExpress.

Marketplace Central was designed to work seamlessly with any WMS, ERP or OMS system including Manhattan, SAP, Blue Yonder, Korber, Oracle NetSuite, Acumatica, Dynamics, enVista, Aptos, Epicor, Sterling, Infor or Salesforce.
